Benefits Owner's Manual

BENEFITS OF OWNING A CAL FLAME BARBECUE

Owning a barbecue allows you to have a wonderful outdoor place to cook a nutritious family meal. It offers a place for you to socialize with family and friends. A barbecue provides a great focal point in your backyard when having parties, family get-together or just to hang out with your kids. Owning a barbecue can add character to your patio and/or yard.

As with any new improvement to an existing area, precautions must be made before development can take place. Throughout this manual, the owner will encounter 3 product lines - Barbecues, Firepits/fireplaces, and Carts. Each product line will have similar lighting methods.

IT IS THE OWNERS RESPONSIBILITY TO ENSURE THAT AN EXISTING NATURAL GAS LINE IS INSTALLED AND SAFE TO USE. CAL SPAS HIGHLY RECOMMENDS THAT THE OWNER HAVE A LICENSED TECHNICIAN RUN ALL NATURAL GAS LINES AND CONNECT ALL NATURAL GAS HOOK-UPS. CAL SPAS IN NO WAY WILL BE HELD RESPONSIBLE FOR AN IMPROPERLY CONNECTED GAS LINE.

THE LIGHTING INSTRUCTIONS FOR THE ISLANDS AND CARTS IS IDENTICAL. PLEASE FOLLOW THESE INSTRUCTIONS CAREFULLY, AS ANY DEVIATION MAY RESULT IN SERIOUS INJURY, OR POSSIBLY DEATH.

Page 2 Owner's Manual

Owner's Manual Safety Precautions

SAFETY PRECAUTIONS

1. This gas barbeque must be installed and operated in accordance with the installation requierements of your local gas authority or the appropriate installation code in the area of installation. In the absence of local codes with either the National Fuel Gas code, ANSI Z223.1 / NFPA 54, or CAN/CGA-B149.1, Natural Gas and Propane Installation code.

- 2. If an external source is utilized, this gas grill, when installed, must be electronically grounded in accordance with the local codes or, in the absence of local codes, with the National Electric Code, ANSI/NFPA 70. Or the Canadian Electrical Code, CSAC22.1.
- 3. This grill is designed for outdoour use only and shall not be used in a building, garage, or any other enclosed area.
- 4. This outdoor grill is not intended for use with recreational vehicles and/or boats.
- 5. Operate this gas grill only in areas free of obstructions for cumbustion and ventilation air.
- 6. CHECK FOR GAS LEAKS! Once the barbeque has been assembled and installed, make sure the gas valves are in the "OFF" position. Turn gas "ON" at the source. Use a small brush to applywarm soapy water solution to all the gas connections (1/2 water, 1/2 dish soap). If a gas leak is present, bubbling at the leak site will occur. Using an approved pipe thread sealant can repair gas leaks or approved Teflon tape. The flexible gas hose must be inspected before each use. **NEVER USE A NAKED FLAME FOR TESTING LEAKS!**
- 7. BURNERS: The location of the burners to the main orifice is vital for safe operation, check to assure the valve orifices are inside the burner tubes before using the gas grill. If the venturi of the burner is not correctly positioned over the valve orifices, explosion and/or fire may occur when lighting the gas grill. Be careful not to damage the ceramic spark electrodes. (See figure 41)
- 8. HOSE ASSEMBLY AND SAFETY: If the hose shows signs of deterioration or damage, use a soap and water solution and then test the entire outer surface of the hose while under pressure. Replace at the first sign of a leak or if age cracking becomes apparent. Remember to turn the gas supply off before disconnecting. The hose must remain free of kinks and sharp bends. Never puncture or put stress on the hose fittings. Replace the hose only with the manufacturers original equipment. Hose is located in the drip pan area on the right side wall. Pull out drip pan for inspection.
- 9. HOSE: If the hose shows signs of deterioration or damage, use a soap and water solution to test the entire outer surface of the hose while under pressure, checking for bubbles at the leak site. Replace the hose at the first sign of a leak or if age cracking becomes apparent. Remember to turn off the gas before removing the hose.
- 10. Keep any electrical cord and the fuel supple hose away from any heated surfaces.

Owner's Manual Safety Instructions

SAFETY INSTRUCTIONS

Please read before installing and operating your new Cal Flame grill.

1. Your new gas grill should be professionally installed by a licensed contractor. Refer to the instructions in this manual to ensure proper and safe installation and operation.

2. IF YOU SMELL GAS:

- A. Shut off gas to grill.
- B. Extinguish any open flame.
- C. Open lid.
- D. If odor persists, immediately call your gas supplier or your fire department.

DO NOT TRY TO FIX THE PROBLEM YOURSELF.

- 3. **CAUTION**: To prevent fire and smoke damage, remove all packaging material before operating grill.
- 4. Before you start cooking: Clean the grill thoroughly with hot, soapy water. This is necessary to remove residuals and solvents, oil and grease which may have remained from the manufacturing process. The grates should also be thoroughly cleaned in the same manner.
- 5. Spiders and other insects can nest in the burners of the grill and block the gas and airflow to the burner ports. This creates a dangerous condition that can result in a fire from behind the valve panel. Inspect and clean the burners periodically; follow guidelines in the Cleaning and Maintenance section of this manual.
- 6. In the event that a burner goes out and gas escapes, turn off the burner knobs, open the grill hood fully and let it air-out. Do not attempt to use the grill or any other island feature until the gas has had time to dissipate.
- 7. Unless specifically recommended in this manual, do not repair or replace any part of the grill. A qualified technician should perform all of the service. Any repairs made by a non- C.A.I. approved dealer technician will void your warranty.
- 8. Never use the grill without the drip pan in place and pushed all the way to the rack located just under the grill. Without it, hot grease could leak downward and produce a fire or explosion hazard.
- 9. Keep any electrical supply cord, or the rotisserie motor card away from the heated areas of the grill.
- 10. Never use the grill or side burner in windy conditions. If located in a consistently windy area (oceanfront, mountaintop, etc.) a windbreak will be required. Always adhere to the specified clearances listed in this manual.
- 11. The area surrounding your new grill should be kept clean, and free from flammable liquids and other combustible materials such as mops, rags, brooms, as well as solvents, cleaning fluids, and gasoline.
- 12. Do not use the grill as a storage area for flammable or plastic items, which may ignite. Do not store any materials inside or near BBQ island. Any LPG (Propane) cylinder not is use, should not be stored in the vicinity of this or any other appliance.
- 13. Never line grill or side burners with tin foil.
- 14. When the unit is not in use, be sure to turn off the gas at the LPG tank.
- 15. Never locate this appliance in an enclosed room or under sealed overhead structure or any type of enclosed area such as a garage, shed, or breezeway. Keep clear of trees and shrubs.

16. Do not place this grill under or near windows or vents that can be opened into your home.

Page 4 Owner's Manual

Safety Instructions Owner's Manual

Precautions Regarding Children

- 1. Never leave children unattended in the area where the grill is being used.
- 2. Do not store items of interest to children around or below the grill or island.
- 3. Never allow children to sit or stand on any part of the grill or island.

Use Precautions

- 1. Never leave the grill and side burners unattended while using high flame settings. Boil-overs cause smoking and greasy boil-overs may ignite.
- 2. Always use the proper size pan. Select utensils with flat bottoms large enough to cover the burner. The use of under-sized utensils exposes the sides of the utensils to direct contact with a portion of the flame. This can scorch utensils, and hamper cleanup. Excessive flames on large stainless steel pots can result in permanent discoloration. For best results, we recommend commercial quality aluminum pans and utensils.
- 3. Always position handles of utensils inward, so they do not extend over adjacent work areas or cooking areas. This reduces the risk of burns, ignition of flammable materials, and spillage due to accidental contact with the utensils.
- 4. Do not use water on grease fires. Never pick up a flaming pan. Turn appliance off and smother the flaming pan with a tight-fitting lid, cookie sheet or flat tray. For flaming grease outside of the pan, smother with baking soda, or use a dry chemical or foam-type fire extinguisher.
- 5. Never let clothing, potholders or other flammable materials come in contact with or close to any grate, burner or hot surface until it has cooled. Fabric may ignite and result in personal injury.
- 6. When using the grill, do not touch the grill rack, burner grate, or immediate surroundings, as these areas become extremely hot and could cause burns.
- 7. Proper apparel is a safety consideration. Never wear loose fitting or hanging garments while using your new grill.
- 8. Only use dry potholders do not use a towel or other bulky cloth in place of potholders. Moist or damp potholders used on hot surfaces could cause burns.
- 9. Do not heat any unopened glass or metal container of food on the grill. Pressure may build up and cause the container to burst resulting in serious harm or damage to the grill.
- 10. Do not use charcoal in this grill or side burner.
- 11. Do not attempt to move stainless steel cart while hot or in use.
- 12. It is extremely important to lock all caster wheels even on flat even surfaces.
- 13. Do not lean, sit or stand on the stainless steel cart, including the foldout work surfaces.
- 14. Do not exceed 50 pounds of weight on the foldout work surfaces.
- 15. Do not block the vents located in the cabinet area of your Cal Flame Island and Stainless Steal Cart as gas may build up incase of leak and cause serious damage.
- 16. Your grill must be plugged into a permanent, grounded 110 VAC outlet with a dedicated 15A GFCI breaker. Do not use an extension cord to supply power to your Cal Flame Island, Grill or Cart. Such use may result in fire, electrical shock or other personal injury. Do not install a fuse in the neutral or ground circuit. A fuse in the neutral or ground circuit may result in an electrical shock hazard. Do not ground this appliance to a gas supply pipe or hot water pipe. Keep any electrical supply cord and the fuel supply hose away from any heated surfaces.
- 17. Do not reach over your grill or any other surfaces when hot or in use.

SAVE THIS MANUAL FOR FUTURE REFERENCE

CONTACT INFORMATION

For customer service, please contact your authorized dealer immediately. If you need additional information and/or assistance, please contact:

C.A.I. Customer Service Department

1462 East Ninth Street

Pomona, CA 91766 Toll Free 1-800-CAL-SPAS Fax 1-909-629-3890

WARRANTY INFORMATION

See your Cal Flame Barbecue dealer for a copy of the applicable warranty, details and any questions you may have regarding the warranty coverage on your barbecue.

Warranty Limitations

The Limited Warranty is void if the barbecue has been subject to negligence, alteration, misuse, abuse, repairs by non- C.A.I. authorized representatives, incorrect electrical installation, acts of God and any other cases beyond the control of C.A.I. Examples of common acts invalidating this warranty include but are not limited to:

Scratches caused by normal use.

Damage caused by extreme weather conditions. (Hot, Cold, etc.)

Damage caused by dirt, sand, and/or water damage.

Damage caused by continued operation of the barbecue with either known or unknown problems.

Damage caused by direct sunlight.

Damage caused as a result of failure to follow the operating instructions as defined in this Owner's Manual.

This Limited Warranty applies only to barbecues normally used for personal, family, or household purposes.

This Limited Warranty specifically excludes commercial barbecues.

Warranty Exclusions

C.A.I. warranties the barbecues from defects in material and workmanship for a period of one year from the original date of purchase.

Barbecue stereo systems are delivered with their own manufacture warranty. For more information, please see their warranties in the owner's information package that was delivered with your barbecue for more information.

Locating Product Serial Number

BBQ Islands

Your new Cal Flame Island BBQ serial number is located on a metal plate inside the door below the grill on the door. You will need this number to properly register your BBQ and activate coverage.

Please write this number in the space provided for future reference:

Serial Number:	Delivery Date:
----------------	----------------

<u>REMINDER:</u> PLEASE DO NOT FORGET TO REGISTER YOUR NEW PRODUCT AT WWW.CALSPAS.COM

Page 6 Owner's Manual

Owner's Manual Delivery and Set-Up

DELIVERY AND SET-UP

Please make a record of the following. It will be valuable if service is required.

Barbecue Model:	
Barbecue Serial Number:	
Date Purchased:	
Date Installed:	
Barbecue Dealer's Phone Number:	
Barbecue Dealer's Address:	

Most cities and counties require permits for exterior construction and electrical circuits. In addition, some communities have codes requiring residential barriers such as fencing and/or self-closing gates on property to prevent unsupervised access to the property by children under the age of 5. Your dealer can provide information on which permits may be required and how to obtain them prior to the delivery of your equipment.

PLANNING THE BEST LOCATION FOR YOUR BARBECUE

Safe and satisfactory operation of your new grill depends upon its proper installation. The installation, adjustments and service of your new grill must be performed by C.A.I. qualified installers and service technicians. This is necessary to ensure proper operation and also prevent accidents.

Location (Outdoor Use Only)

When planning your Cal Flame Island or cart location, be sure to consider the shortest gas line run possible. Also, take into consideration the necessity of having a 100v power source. For use of your appliances (i.e. lights, rotisserie, refrigerator, receptacles, etc.).

When determining a suitable location, take into account concerns such as exposure to wind, proximity to traffic paths, and windows that open into the home. Keeping in mind natural gas line runs need to be as short as possible. Locate the grill only in a well ventilated area.

Locate BBQ Islands grills and stainless steel carts in well ventilated areas, and only on solid, flat foundations (i.e. cement slab or deck). Do not place BBQ Islands/ Outdoor Kitchens or stainless steel carts on dirt or grass.

Built-In Installation

Your new grill is designed for easy installation into a non-combustible enclosure. The supporting deck and counter must be level and flat. When determining the final location of your grill, it is required that ventilation be provided in the enclosure so that gas will not become entrapped in the event of a leak. Make sure that you have one vent placed at floor level and the other at 5" above floor level.

Built-In Design Models

If using a rear wall, locate a weather proof electrical outlet on the side of the grill that the rotisserie motor will be located on. The rotisserie motor requires a 110/120v supply. The power supply cord on the motor is equipped with a 3-prong (grounded) plug for protection against shock hazard. Do not cut or remove the grounding prong from the plug.

Drop-In Grills Owner's Manual

GRILL OPERATION - DROP-IN GRILLS

Grilling

Grilling requires high heat for searing and proper browning. Most foods are cooked at the HI heat setting for the entire cooking time. However, when grilling large pieces of meat or poultry, it may be necessary to turn the heat to a lower setting after the initial browning. This cooks the food through without burning the outside. Foods cooked for a long time or basted with a sugary marinade may need to lower heat setting near the end of the cooking time. Warming rack is used for defrosting or for keeping food warm while grilling.

Grilling Hints

The cooking of meat, whether rare, medium, or well done, is affected to a large degree by the thickness of the cut. Expert chefs say it is impossible to have a rare piece of meat with a thin cut.

The cooking time is affected by the kind of meat, also by the size and the shape of the cut, the temperature of the meat when cooking begins, and the cooking degree desired.

When defrosting meats, it is recommended that it be done overnight in the refrigerator as opposed to a microwave. This generally yields a juicier cut of meat.

Use a spatula instead of tongs or a fork to turn the meat. A spatula will not puncture the meat and let the juices run out.

To get the juiciest meats, add seasoning or salt after the cooking is finished and turn the meat only once (juices are lost when the meat is turned several times). Turn the meat just after the juices begin to bubble to the surface.

Trim any excess fat from the meat before cooking. To prevent steaks or chops from curling during cooking, slit the fat around the edges at 2-inch intervals.

Do not leave the grill unattended while cooking.

Light (Illumination) Operation

Your Cal Flame Grill is equipped with either 1-halogen light (CR-3000) or 2-halogen lights (CR-4000 & CR-5000). This feature is added for safety when cooking in non-illuminated areas. Also, for convenience when cooking in poorly illuminated areas or simply for an inviting display of deliciously grilled food.

The On/Off switch controlling your halogen light(s) is located at the control panel on the front lower left side (see **Figure 25**).

Your grill is equipped with a grounded (3 prong) 120 VAC plug located in the lower, left, rear corner of your cart and must be plugged into a permanent, grounded 120 VAC outlet with a dedicated 15amp GFI breaker. DO NOT cut or remove the ground prong as this may result in fire, electrical shock or other personal injury. This electrical source provides power to the lights, refrigerator and rotisserie.

NOTE: On units with the rotisserie option, an additional outlet will be needed to utilize the rotisserie burner.

WARNING: Lock all casters on all cart wheels even when installed on flat level surfaces.

Page 8 Owner's Manual

Owner's Manual Drop-In Grills

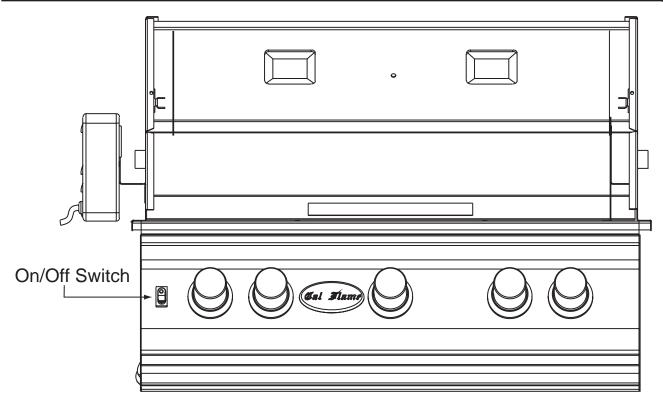

Figure 1. Light Operation

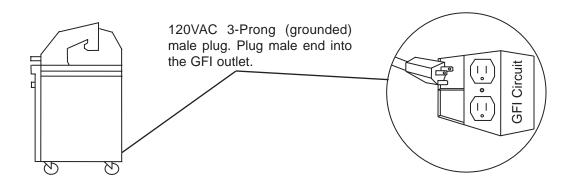

Figure 2. GFI Breaker.

Operating the Grill

Make sure all burner controls are off. Do not attempt to light the burners if the smell of gas is present. Check the connection with a soap and water solution after attaching the hose. For LP units, make sure there is gas in the tank and it is sitting upright. For natural gas units, make sure the shut off valve is on.

- 1. Make sure the drip tray is in place.
- 2. Light the grill burners using the instructions below.
- 3. Turn the control knob to HI and preheat the grill for 15 minutes. The top cover is to be closed during the appliance preheat period.
- 4. Place the food on the grill and cook to desired completion. Adjust heat setting, if necessary. The control knob may be set to any position between HI and LOW.
- 5. Allow the grill to cool and clean the drip tray after each use.

Drop-In Grills Owner's Manual

Lighting The Grill Burners

- 1. Open the hood.
- 2. Keep your face as far away from the burners as possible.
- 3. Rapidly rotate the burner knob counter clockwise past light position (You will hear a loud click) to high.
- 4. Listen for the "Whoosh" sound. If the burner does not light on the first try, repeat immediately.
- 5. If the burner does not light after three attempts, turn the control knobs to the OFF position. Wait 5 minutes until the gas clears before attempting to light it again.
- 7. Repeat the procedure or try "Manual Lighting procedure" below.
- 8. Upon successful lighting, repeat the process on the other burners you wish to light.
- 9. To shut off burners rotate knob and turn to OFF. It is normal to hear a popping sound when the burners returned off.

Manually Lighting The Grill Burners

- 1. Open the hood.
- 2. If you have just attempted to light the burner, allow 5 minutes for any accumulated gas to dissipate.
- 3. Slide out the drip tray from the grill.
- 4. Keep your face as far away from the burners as possible.
- 5. Using only a long stem match, hold near the burner ports.
- 6. Push in and turn counter clockwise the grills gas control knob just past the LIGHT position to HIGH.
- 7. Listen for the "Whoosh" sound. If the burner does not light after 5 seconds, turn the control knobs to the OFF position. Wait 5 minutes until the gas clears before attempting to light it again.
- 8. If the burner does not light after several attempts see Troubleshooting Guide in the back of this manual.

Using Your Rotisserie

The rotisserie burner is an infrared type, which provides intense searing radiant heat. Preferred by professional chefs over other methods, this intense heat is ideal for searing in the natural juices and nutrients found in quality cuts of meat.

Cooking with the Rotisserie

The rotisserie system is designed to cook items from the back using infrared heat. The location of the burner allows the placement of a rotisserie-basting pan (included) beneath the food to collect juices and drippings for basting and gravy. To flavor the contents of the basting pan, you can add herbs, onion, garlic, or spices.

Operating The Rotisserie

- 1. To load the rotisserie rod, hold the handle firmly while sliding one of the fork assemblies (prongs facing away from the handle) onto the rod. Push the rod through the center of the food, then slide the other holder (prongs toward the food) onto the rod. Center the meat on the rod and push the fork assemblies firmly together. Tighten the thumbscrews. To secure any loose portions of your meat, use butcher string (never use nylon or plastic string). Place basting pan under the food to collect the drippings.
- 2. To use the rotisserie, first mount the motor on the left side of the grill. Place securely onto support bracket.
- 3. The rod of the rotisserie system is assembled into the motor by placing the pointed end into the motor and resting the threaded end on the support at the side of the grill. Once the rod is pushed as far as possible into the motor, the grooved end of the rod should rest on the right side bracket.
- 4. If necessary, to offset unbalanced loads, slide the counter weight on to the rod. With the counter weight loose, allow the loaded rod to rotate and come to a stop. Now rotate the counter weight above the rod in a vertical position and tighten the thumbscrew. You can slide the counter weight away from or closer to the rotisserie rod as needed for balanced operation. Once lit, the rotisserie burner will reach cooking temperature in about 1 minute. The orange/red glow will even out in about 5 minutes.

Page 10 Owner's Manual

Owner's Manual Drop-In Grills

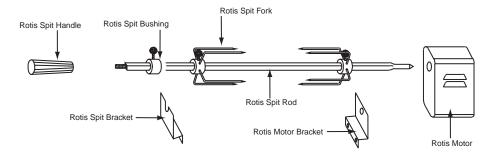

Figure 3. Rotisserie Burner Assembly

Lighting The Infrared or Rotisserie Burner

- 1. Open the hood.
- 2. Push and hold the rotisserie burner knob in for about 5 seconds to allow gas into the the infrared burner, then rotate knob rapidly counter clockwise past the light position (You will hear a loud click).
- 3. If the burner does not light on the first try, repeat immediately.
- 4. If the burner does not light within 5 seconds, turn the control knob to the OFF position. Wait 5 minutes until the gas clears before attempting to light it again.
- 5. Repeat the procedure or try "Manual Lighting procedure" as shown below.
- 6. Upon successful lighting, repeat the process on any other available IR burner you may wish to light.

Manually Lighting The Infrared or Rotisserie Burner

- 1. Open the hood.
- 2. Push in rotisserie knob and turn to light position, hold in for about 5 seconds to allow gas into the infrared burner, then rotate knob rapidly counter clockwise past the light position (You will hear a loud click).
- 3. Hold a lit long stem match next to the burner ports.
- 4. If the burner does not light within 5 seconds, turn the control knob to the OFF position. Wait 5 minutes until the gas clears before attempting to light it again.
- 5. If the burner does not light after several attempts see troubleshooting located in the back of this manual.
- 6. Upon successful lighting, repeat the process on any other available IR burner you may wish to light.

Drop-In Grills Owner's Manual

Cal Flame Familiarization

The following controls are for the Cal Flame Drop-In Grills, Stainless Steel Carts, Chef Series, Master Chef Series & Gourmet Series Islands. Please familiarize yourself with these controls prior to operation of your Cal Flame BBQ.

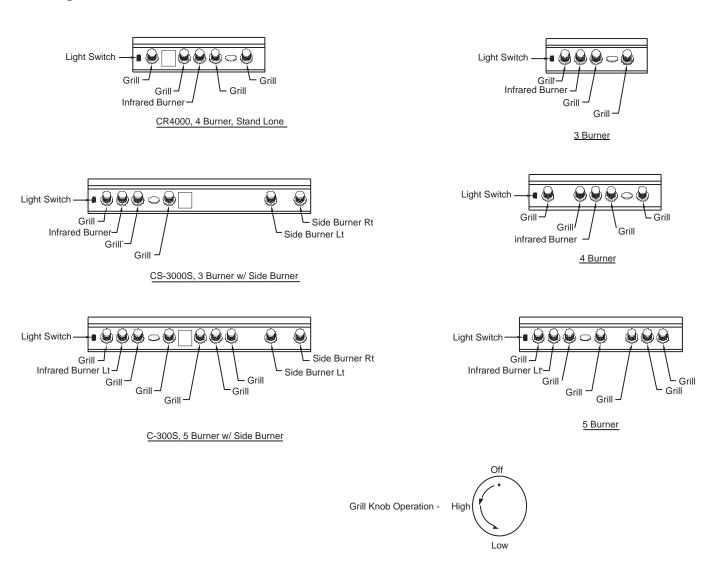

Figure 5. Grill Knob Operation

Page 12 Owner's Manual

Owner's Manual Islands

GRILL OPERATION - ISLANDS

Grilling

Grilling requires high heat for searing and proper browning. Most foods are cooked at the HI heat setting for the entire cooking time. However, when grilling large pieces of meat or poultry, it may be necessary to turn the heat to a lower setting after the initial browning. This cooks the food through without burning the outside. Foods cooked for a long time or basted with a sugary marinade may need to lower heat setting near the end of the cooking time. Warming rack is used for defrosting or for keeping food warm while grilling.

Grilling Hints

The cooking of meat, whether rare, medium, or well done, is affected to a large degree by the thickness of the cut. Expert chefs say it is impossible to have a rare piece of meat with a thin cut.

The cooking time is affected by the kind of meat, also by the size and the shape of the cut, the temperature of the meat when cooking begins, and the cooking degree desired.

When defrosting meats, it is recommended that it be done overnight in the refrigerator as opposed to a microwave. This generally yields a juicier cut of meat.

Use a spatula instead of tongs or a fork to turn the meat. A spatula will not puncture the meat and let the juices run out.

To get the juiciest meats, add seasoning or salt after the cooking is finished and turn the meat only once (juices are lost when the meat is turned several times). Turn the meat just after the juices begin to bubble to the surface.

Trim any excess fat from the meat before cooking. To prevent steaks or chops from curling during cooking, slit the fat around the edges at 2-inch intervals.

Do not leave the grill unattended while cooking.

Light (Illumination) Operation

Your Cal Flame Grill is equipped with either 1-halogen light (CR-3000) or 2-halogen lights (CR-4000 & CR-5000). This feature is added for safety when cooking in non-illuminated areas. Also, for convenience when cooking in poorly illuminated areas or simply for an inviting display of deliciously grilled food.

The On/Off switch controlling your halogen light(s) is located at the control panel on the front lower left side.

Your grill is equipped with a grounded (3 prong) 120 VAC plug located in the lower, left, rear corner of your cart and must be plugged into a permanent, grounded 120 VAC outlet with a dedicated 15amp GFI breaker. DO NOT cut or remove the ground prong as this may result in fire, electrical shock or other personal injury. This electrical source provides power to the lights, refrigerator and rotisserie.

NOTE: On units with the rotisserie option, an additional outlet will be needed to utilize the rotisserie burner.

WARNING: Lock all casters on all cart wheels even when installed on flat level surfaces.

Operating the Grill

Make sure all burner controls are off. Do not attempt to light the burners if the smell of gas is present. Check the connection with a soap and water solution after attaching the hose. For LP units, make sure there is gas in the tank and it is sitting upright. For natural gas units, make sure the shut off valve is on.

Islands Owner's Manual

- 1. Make sure the drip tray is in place.
- 2. Light the grill burners using the instructions below.
- 3. Turn the control knob to HI and preheat the grill for 15 minutes. The top cover is to be closed during the appliance preheat period.
- 4. Place the food on the grill and cook to desired completion. Adjust heat setting, if necessary. The control knob may be set to any position between HI and LOW.
- 5. Allow the grill to cool and clean the drip tray after each use.

Lighting The Grill Burners

- 1. Open the hood.
- 2. Keep your face as far away from the burners as possible.
- 3. Rapidly rotate the burner knob counter clockwise past light position (You will hear a loud click) to high.
- 4. Listen for the "Whoosh" sound. If the burner does not light on the first try, repeat immediately.
- 5. If the burner does not light after three attempts, turn the control knobs to the OFF position. Wait 5 minutes until the gas clears before attempting to light it again.
- 7. Repeat the procedure or try "Manual Lighting procedure" below.
- 8. Upon successful lighting, repeat the process on the other burners you wish to light.
- 9. To shut off burners rotate knob and turn to OFF. It is normal to hear a popping sound when the burners returned off.

Manually Lighting The Grill Burners

- 1. Open the hood.
- 2. If you have just attempted to light the burner, allow 5 minutes for any accumulated gas to dissipate.
- 3. Slide out the drip tray from the grill.
- 4. Keep your face as far away from the burners as possible.
- 5. Using only a long stem match, hold near the burner ports.
- 6. Push in and turn counter clockwise the grills gas control knob just past the LIGHT position to HIGH.
- 7. Listen for the "Whoosh" sound. If the burner does not light after 5 seconds, turn the control knobs to the OFF position. Wait 5 minutes until the gas clears before attempting to light it again.
- 8. If the burner does not light after several attempts see Troubleshooting Guide in the back of this manual.

Using Your Rotisserie

The rotisserie burner is an infrared type, which provides intense searing radiant heat. Preferred by professional chefs over other methods, this intense heat is ideal for searing in the natural juices and nutrients found in quality cuts of meat.

Cooking with the Rotisserie

The rotisserie system is designed to cook items from the back using infrared heat. The location of the burner allows the placement of a rotisserie-basting pan (included) beneath the food to collect juices and drippings for basting and gravy. To flavor the contents of the basting pan, you can add herbs, onion, garlic, or spices.

Operating The Rotisserie

1. To load the rotisserie rod, hold the handle firmly while sliding one of the fork assemblies (prongs facing away from the handle) onto the rod. Push the rod through the center of the food, then slide the other holder (prongs toward the food) onto the rod. Center the meat on the rod and push the fork assemblies firmly together. Tighten the thumbscrews. To secure any loose portions of your meat, use butcher string (never use nylon or plastic string). Place basting pan under the food to collect the drippings. Tighten the thumbscrew. You can slide the counter weight away from or closer to the rotisserie rod as needed for balanced operation.

Page 14 Owner's Manual

Owner's Manual Islands

2. To use the rotisserie, first mount the motor on the left side of the grill. Place securely onto support bracket.

- 3. The rod of the rotisserie system is assembled into the motor by placing the pointed end into the motor and resting the threaded end on the support at the side of the grill. Once the rod is pushed as far as possible into the motor, the grooved end of the rod should rest on the right side bracket.
- 4. If necessary, to offset unbalanced loads, slide the counter weight on to the rod. With the counter weight loose, allow the loaded rod to rotate and come to a stop. Now rotate the counter weight above the rod in a vertical position and tighten the Light rotisserie burners following instructions on page 22. Once lit, the rotisserie burner will reach cooking temperature in about 1 minute. The orange/red glow will even out in about 5 minutes.

Lighting The Infrared or Rotisserie Burner

- 1. Open the hood.
- 2. Push and hold the rotisserie burner knob in for about 5 seconds to allow gas into the the infrared burner, then rotate knob rapidly counter clockwise past the light position (You will hear a loud click).
- 3. If the burner does not light on the first try, repeat immediately.
- 4. If the burner does not light within 5 seconds, turn the control knob to the OFF position. Wait 5 minutes until the gas clears before attempting to light it again.
- 5. Repeat the procedure or try "Manual Lighting procedure" as shown below.
- 6. Upon successful lighting, repeat the process on any other available IR burner you may wish to light.

Manually Lighting The Infrared or Rotisserie Burner

- 1. Open the hood.
- 2. Push and hold the rotisserie burner knob in for about 5 seconds to allow gas into the the infrared burner, then rotate knob rapidly counter clockwise past the light position (You will hear a loud click).
- 3. Hold a lit long stem match next to the burner ports.
- 4. If the burner does not light within 5 seconds, turn the control knob to the OFF position. Wait 5 minutes until the gas clears before attempting to light it again.
- 5. If the burner does not light after several attempts see troubleshooting located in the back of this manual.
- 6. Upon successful lighting, repeat the process on any other available IR burner you may wish to light.

Owner's Manual Carts

GRILL OPERATION - CARTS

Grilling

Grilling requires high heat for searing and proper browning. Most foods are cooked at the HI heat setting for the entire cooking time. However, when grilling large pieces of meat or poultry, it may be necessary to turn the heat to a lower setting after the initial browning. This cooks the food through without burning the outside. Foods cooked for a long time or basted with a sugary marinade may need to lower heat setting near the end of the cooking time. Warming rack is used for defrosting or for keeping food warm while grilling.

Grilling Hints

The cooking of meat, whether rare, medium, or well done, is affected to a large degree by the thickness of the cut. Expert chefs say it is impossible to have a rare piece of meat with a thin cut.

The cooking time is affected by the kind of meat, also by the size and the shape of the cut, the temperature of the meat when cooking begins, and the cooking degree desired.

When defrosting meats, it is recommended that it be done overnight in the refrigerator as opposed to a microwave. This generally yields a juicier cut of meat.

Use a spatula instead of tongs or a fork to turn the meat. A spatula will not puncture the meat and let the juices run out.

To get the juiciest meats, add seasoning or salt after the cooking is finished and turn the meat only once (juices are lost when the meat is turned several times). Turn the meat just after the juices begin to bubble to the surface.

Trim any excess fat from the meat before cooking. To prevent steaks or chops from curling during cooking, slit the fat around the edges at 2-inch intervals.

Do not leave the grill unattended while cooking.

Light (Illumination) Operation

Your Cal Flame Grill is equipped with either 1-halogen light (CR-3000) or 2-halogen lights (CR-4000 & CR-5000). This feature is added for safety when cooking in non-illuminated areas. Also, for convenience when cooking in poorly illuminated areas or simply for an inviting display of deliciously grilled food.

The On/Off switch controlling your halogen light(s) is located at the control panel on the front lower left side.

Your grill is equipped with a grounded (3 prong) 120 VAC plug located in the lower, left, rear corner of your cart and must be plugged into a permanent, grounded 120 VAC outlet with a dedicated 15amp GFI breaker. DO NOT cut or remove the ground prong as this may result in fire, electrical shock or other personal injury. This electrical source provides power to the lights, refrigerator and rotisserie.

NOTE: On units with the rotisserie option, an additional outlet will be needed to utilize the rotisserie burner.

WARNING: Lock all casters on all cart wheels even when installed on flat level surfaces.

Page 22 Owner's Manual

Carts Owner's Manual

Operating the Grill

Make sure all burner controls are off. Do not attempt to light the burners if the smell of gas is present. Check the connection with a soap and water solution after attaching the hose. For LP units, make sure there is gas in the tank and it is sitting upright. For natural gas units, make sure the shut off valve is on.

- 1. Make sure the drip tray is in place.
- 2. Light the grill burners using the instructions below.
- 3. Turn the control knob to HI and preheat the grill for 15 minutes. The top cover is to be closed during the appliance preheat period.
- 4. Place the food on the grill and cook to desired completion. Adjust heat setting, if necessary. The control knob may be set to any position between HI and LOW.
- 5. Allow the grill to cool and clean the drip tray after each use.

Figure 27. 4-Burner Cart

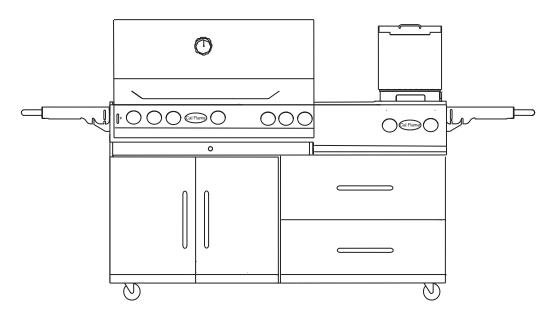

Figure 28. 5-Burner Cart

Owner's Manual Convection 3000 Grill

CONVECTION 3000 4-BURNER GRILL

Outdoor barbecue grills have become increasingly popular for the summertime cooking of meats and vegetables. Traditionally, barbecue grills have been heated by charcoal briquettes, but a new generation of barbecue grills are heated by gas fired burners.

Many modern barbecue grills have a closeable hood or other structure which can be used to provide an enclosed heating compartment. Such heating compartments can be used like the oven on a stove to slow roast various items of food, such as large pieces of meat.

A problem with present-day barbecue grills is that the heat within the cooking compartment is non-uniform. The heat in the central portion of the cooking department tends to be much more intense than the heat in the side portions of the cooking compartment. This leads to uneven cooking within the cooking compartment and makes use of the outdoor grill somewhat haphazard.

Accordingly, there is need for a barbecue grill which overcomes this problem in the prior art.

Grill Operation - Convection 3000 Grill Grilling

Grilling requires high heat for searing and proper browning. Most foods are cooked at the HI heat setting for the entire cooking time. However, when grilling large pieces of meat or poultry, it may be necessary to turn the heat to a lower setting after the initial browning. This cooks the food through without burning the outside. Foods cooked for a long time or basted with a sugary marinade may need to lower heat setting near the end of the cooking time. Warming rack is used for defrosting or for keeping food warm while grilling.

Grilling Hints

The cooking of meat, whether rare, medium, or well done, is affected to a large degree by the thickness of the cut. Expert chefs say it is impossible to have a rare piece of meat with a thin cut.

The cooking time is affected by the kind of meat, also by the size and the shape of the cut, the temperature of the meat when cooking begins, and the cooking degree desired.

When defrosting meats, it is recommended that it be done overnight in the refrigerator as opposed to a microwave. This generally yields a juicier cut of meat.

Use a spatula instead of tongs or a fork to turn the meat. A spatula will not puncture the meat and let the juices run out.

To get the juiciest meats, add seasoning or salt after the cooking is finished and turn the meat only once (juices are lost when the meat is turned several times). Turn the meat just after the juices begin to bubble to the surface.

Trim any excess fat from the meat before cooking. To prevent steaks or chops from curling during cooking, slit the fat around the edges at 2-inch intervals.

Do not leave the grill unattended while cooking.

Light (Illumination) Operation

Your Cal Flame Grill is equipped with either 1-halogen light (CR-3000) or 2-halogen lights (CR-4000 & CR-5000). This feature is added for safety when cooking in non-illuminated areas. Also, for convenience when cooking in poorly illuminated areas or simply for an inviting display of deliciously grilled food.

The On/Off switch controlling your halogen light(s) is located at the control panel on the front lower left side.

WARNING: Lock all casters on all cart wheels even when installed on flat level surfaces.

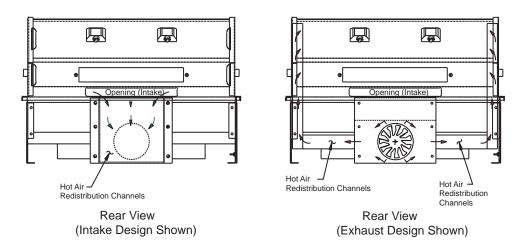

Figure 30. Intake and Exhaust Designs

Page 26 Owner's Manual

Convection 3000 Grill Owner's Manual

Cooking with the Convection 3000 Grill

Use a meat thermometer and take the guesswork out of cooking meat and seafood. The fan must be turned on in order for the Convection 3000 Grill to cook the items that are listed below.

IMPORTANT:

After desired cooking temperature is reached, remove meat from heat source and let it stand 10 to 15 minutes before carving. The amount of time required for resting varies with the size of the cuts of your meat. During this resting time, the meat continues to cook (meat temperature will rise 5P to 20P after it is removed from the heat source.

Roasts, Steaks and Chops

Grill Installation Owner's Manual

GRILL INSTALLATION

Safe and satisfactory operation of your new grill depends upon its proper installation. The installation, adjustments and service of your new grill must be performed by C.A.I. qualified installers and service technicians. This is necessary to ensure proper operation and also prevent accidents.

Location (Outdoor Use Only)

When planning your Cal Flame Island or cart location, be sure to consider the shortest gas line run possible. Also, take into consideration the necessity of having a 110 volts power source. For use of your appliances (i.e. lights, rotisserie, refrigerator, receptacles, etc.).

When determining a suitable location, take into account concerns such as exposure to wind, proximity to traffic paths, and windows that open into the home. Keeping in mind natural gas line runs need to be as short as possible. Locate the grill only in a well ventilated area

Locate BBQ Islands grills and stainless steel carts in well ventilated areas, and only on solid, flat foundations (i.e. cement slab or deck). Do NOT place BBQ Islands / Outdoor Kitchens or stainless steel carts on dirt or grass.

Built-in Installation

Your new grill is designed for easy installation into a non-combustible enclosure. The supporting deck and counter must be level and flat. When determining the final location of your grill, it is required that ventilation be provided in the enclosure so that gas will not become entrapped in the event of a leak. Make sure that you have one vent placed at floor level and the other at 5 inches above floor level.

Built-in Design Models

If using a rear wall, locate a weatherproof electrical outlet on the side of the grill that the rotisserie motor will be located on. The rotisserie motor requires a 110/120-volt supply. The power supply cord on the motor is equipped with a 3-prong (grounded) plug for protection against shock hazard. Do not cut or remove the grounding prong from the plug.

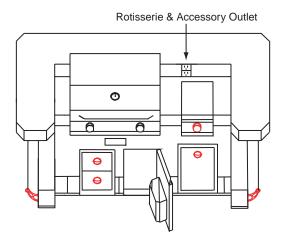

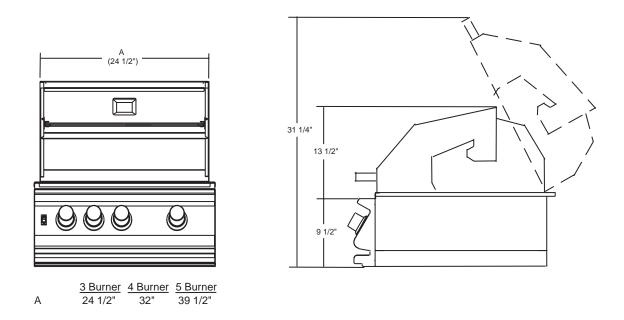

Figure 31. Rotisserie and Accessory Outlet Location

Page 28 Owner's Manual

Owner's Manual Grill Installation

Cabinet Cut-Out Dimensions for Gas Grill and Accessories

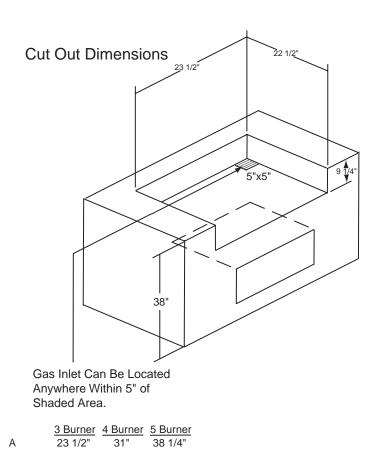

Figure 32. Cabinet Cut-Out Dimensions

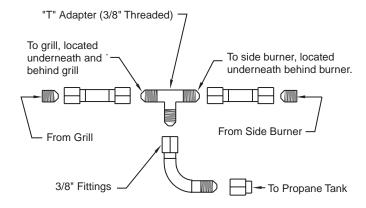

INSTALLATION OF NEW SIDE BURNER

- 1. Install side burner size: 12 1/4" High, 7 3/4" Wide(w/2" rear end stand) total: 9 3/4".
- 2. Assemble a 3/8 pipe nipple to the 3/8 pipe tee using teflon tape or pipe sealant. Use only sealant that is approved for use on LP gas.
- 3. Install the pipe tee assembly to the grill intake pipe with pipe sealant. Tighten assembly and align the branch opening of the tee with the hole of the cabinet.
- 4. Connect the flexible hose (male end) to the pipe tee with pipe sealant.
- 5. Install and secure the side burner into the island by simply setting in place.
- 6. Connect the female end of the flexible hose to the side burner intake pipe with pipe sealant.
- 7. Connect gas supply to the grill.
- 8. Check for gas leaks using soap water solution. (1 part liquid soap, 3 parts water).

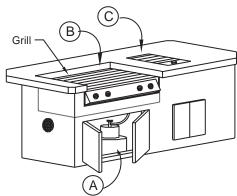

BARBECUE GASLINE

Items Included with Barbecue

- 1) "T" adapter (3/8")
- 2) 2 each Hose 3/8" Fittings
- 3) Regulatorw/ Hose

A Open barbecue door. Install hose with regulator on propane tank. Then connect other end to "T" adapter. Make sure to use gas rated tape seal when installing adapter to insure proper seal.

- B Then take other end of "T" adapter with hose attached and connect to end of male located underneath and at the back of the grill. (Use gas rated tape seal on all connections).
- Connect the last open line to the side burner (Use gas rated tape seal on all connections)

NOTE: You will need to use a gas rated sealer on all gas connectors (Tape, pipe dope, ect.)

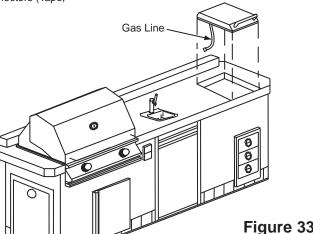

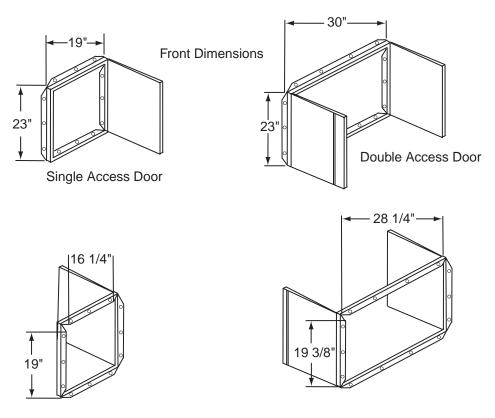

Figure 33. Side Burner Installation

Page 30

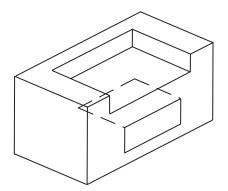

INSTALLATION OF NEW ACCESS DOORS

Installing Access Doors

- 1. Provide cut out and door jamb with inside dimensions as follows:
 - 16 1/4" X 19 " for single door
 - 28 1/4" x 19 3/8" for double door
- 2. Secure the steel frame with 16 screws of type #10 x 3/4" truss head phillips S/S.
- 3. Attach doors to frame.
- 4. Adjust doors as follows:
 - a) For height adjustment, loosen the two screws attached to each mounting plate.
 - b) Snap off hinge and secure mounting plate with #6 X 1" flat phillips S/S.
 - c) For side adjustment turn screw to increase or decrease door overlay.
 - d) For depth adjustment, loosen screw, adjust door to desired position and retighten screw.

Rear Cut-Out Dimensions

Single Door		
Width	18 1/4"	
Height	19"	
Depth	2 1/2"	

Double Door			
Width	28 1/4"		
Height	19 3/8"		
Depth	2 1/2"		

Figure 34. Access Door Installation

Sports Bar Canopy Owner's Manual

SPORTS BAR CANOPY

While the G3000 Island / Sports Bar Canopy is intended for outdoor use, some precautions must be taken when using and caring for your new Cal Flame equipment. When the equipment is not being used, or especially in times of inclement weather, it is the owners responsibility to remove and store the electronic equipment that is listed in this manual. When storing the equipment, it is strongly advised that the equipment be stored in a dry and moisture-free environment. The electronic equipment that is used with the G3000 Island/Sports Bar is high-end audio and video equipment, therefore making them extremely susceptible to moisture damage. It is the owners responsibility to ensure that the G3000 Island/Sports Bar be covered with a water-resistant tarp or plastic sheeting to protect the enclosure.

Any damage incurred from moisture is not covered by the warranty. These preventative care measures must become a part of the owner's maintenance routine. In addition, all efforts should be taken by the owner to keep excessive dirt and foreign debris from settling into the island enclosure. If these requirements are neglected, all warranties on the audio and video components will be void. With a little care and maintenance, you can look forward to many trouble-free years of use.

G3000 ISLAND/SPORTS BAR CANOPY WIRING

Prior to assembling the bar and the canopy, the owner must wire the unit. The wiring plan has been designed with simplicity in mind. Electrical service for this unit requires 120 V/20 AMP circuit breaker for correct operation. If there are any questions dealing with the wire code, please refer to **Figure 35**. All wiring must be ran before the final assembly of the barbecue and before the initial assembly of the canopy.

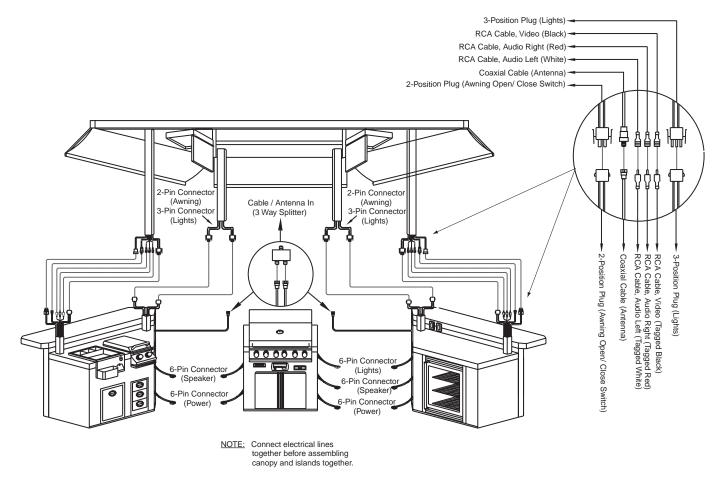

Figure 35. Wiring Instructions

Page 32 Owner's Manual

Owner's Manual Sports Bar Canopy

NOTE:

The following sections show how each wiring connection is to be made. These connections will be identical for the top and bottom of the canopy support post. Make sure that after the connections are made, the cables are tucked gently into each end of the canopy support posts. **DO NOT** let the canopy support posts and canopy support post mounts pinch the cables. If this happens, the cables will be cut and have to be replaced.

Audio/ Video (A/V) Cables

NOTE: There will be two connection points for the A/V cables: one at the top of the canopy support post and one at the bottom of the canopy support post. These cables will be stuffed into each end of the canopy support post.

- 1. The A/V cables are what control the television. They are marked: yellow for video, red for right audio, and white for left audio. The A/V cables will be ran from the television up through the junction box (located on top of the canopy).
- 2. The A/V cables coming from the television will then be plugged into a set of longer cables (color match the cables: red to red, white to white and yellow to yellow).
- 3. Each set of A/V cables will then be feed down (inside) the outside canopy support posts of the canopy .

NOTE: Be sure that each cable is securely attached. If not, the quality of the picture and volume will be affected.

Lights

NOTE: The 3-position (male) connector has 3 metal prongs at the end of it. These prongs fit into the female receptacle of the other connector.

1. Match up the 3-position wire (female) with the 3-position wire (male) and securely attach them together. This step must be repeated for each main support post.

Antenna

NOTE: The G3000 Island/ Sports Bar should already be wired. If not, please refer to the G3000 Island/ Sports Bar Owner's Manual.

1. Match up the coaxial end (female) with the other coaxial end (male) and securely attach them together. Run the single antenna coaxial cable into the 3-way splitter (located under the grill of the G3000 Island/ Sports Bar itself).

Sports Bar Canopy Owner's Manual

Canopy Assembly

The following instructions will allow you to assembly the canopy section of the G3000 Island/ Sports Canopy.

NOTE:

The following sections show how each wiring connection is to be made. These connections will be identical for the top and bottom of the canopy support post. Make sure that after the connections are made, the cables are tucked gently into each end of the canopy support posts. **DO NOT** let the canopy support posts and canopy support post mounts pinch the cables. If this happens, the cables will be cut and have to be replaced.

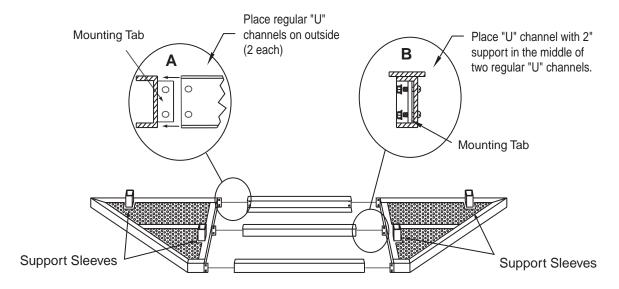

Figure 36. Canopy Assembly

- 1. Lay the two triangle-shaped canopy pieces on a flat and level surface, with the support sleeves facing up.
- 2. Place the "U" channel in between the two triangle-shaped end pieces with the "U" channel facing inward. Line up the holes and bolt into place (**Figure 36A and 36B**). Repeat this step for the opposite end of the "U" channel.
- 3. Repeat this process with all three support "U" channels. Make sure that all three "U" channels are facing inward.
- 4. After making all the wire connections, slide each canopy support post into the support sleeves (located on the canopy). Gently tuck the cables into the support post, making sure not to pinch the cables (**Figure 37**).

Page 34 Owner's Manual

Owner's Manual Sports Bar Canopy

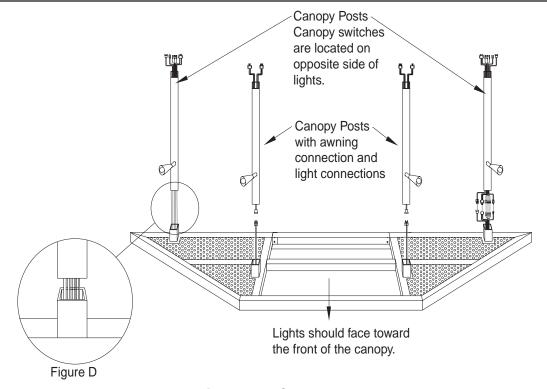

Figure 37. Canopy Assembly

Mounting the G3000 Island/ Sports Bar Canopy

CAUTION: THE FOLLOWING STEP IS A 2-PERSON PROCEDURE. THE CANOPY, AT THIS STAGE, IS EXTREMELY HEAVY. IT IS RECOMMENDED THAT THE OWNER USE A HELPER.

- 1. Carefully rotate the canopy upright and place it as close as possible to the canopy mounting holes.
- 2. Finish connecting all the wires. When complete, stuff the excess wire down into the canopy mounting holes (**Figure 38A**).
- 3. Use care placing the canopy support posts into the canopy mounting holes, as you DO NOT want to pinch the wires.
- 4. Place the provided screens on top of the canopy, in the specified locations (**Figure 38B**).

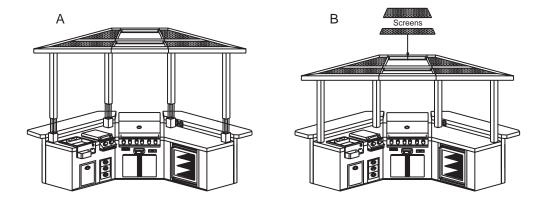

Figure 38. Canopy Final Installation

Sports Bar Canopy Owner's Manual

Awning Installation

With the canopy installation nearly complete, the awning must be installed and wired. It should be noted that all screws that are used for the installation of the awning are self-tapping sheet metal screws. No drilling should be necessary.

- 1. Line up the holes for the awning bracket with the corresponding pre-drilled holes on the awning. Use two carriage bolts for the upper two holes and a flat-head Phillips for the single lower hole. Tighten until snug, but don't over-tighten (**Figure 39A**).
- 2. After mounting the awning bracket, remove the awning from the box. Tilt the awning at a 45P angle and h a n g the awning onto the awning bracket (**Figure 39B**).
- 3. After making sure that the awning is securely hung onto the awning bracket, tilt the awning up to a 45P angle (again) and connect the two electrical leads (male) securely to the two electrical leads (female, attached to the awning). When complete, carefully tuck the wires into the hole and gently lower the awning (**Figure 39C**).
- 4. Place set-screws through the awning bracket and awning into the canopy frame. Do not over-tighten

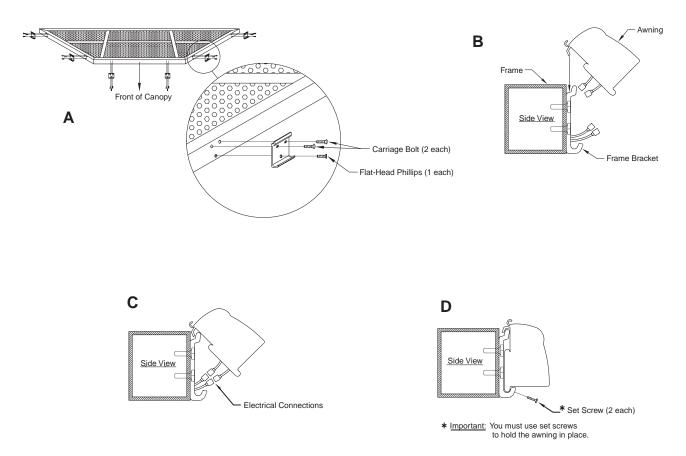

Figure 39. Awning Installation

Awning Open/ Close Switch

NOTE: The 2-position (male) connector has 2 metal prongs at the end of it. These prongs fit into the female receptacle of the other connector.

1. Match up the 2-position wire (female) with the 2-position wire (male) and securely attach them together (**Figure 39 - Insert**). This step must be repeated for each main support post.

Page 36 Owner's Manual

LP Gas Requirements Owner's Manual

LP GAS REQUIREMENTS

LP Gas Requirements

Always check the rating plate to make sure the gas supply you are hooking up to is the gas type the grill is manufactured for.

IMPORTANT WARNING:

All Cal Flame grills are manufactured with the highest regard to safety. For this reason, Cal Flame grills are either manufactured to operate on Liquid Propane (LP) or Natural Gas (NG) and <u>cannot be converted</u>. To verify the grills operating fuel, remove the bottom drip pan and check serial number label on the left. Either LP or NG will be marked on the operating tab, indicating the proper operating fuel. Attempting to convert Cal Flame grills from one fuel to another may result in serious injury and void the warranty coverage.

NOTE:

Please note that if you do not have an updated filler valve on your existing propane tank, you will need to purchase one at your local hardware store, as you will not be allowed to refill the tank at any filling station.

LP Gas Hook Up

NOTE: An enclosure for an LP gas cylinder shall be vented by openings at the level of the cylinder valve and at floor level. The effectiveness of the opening(s) for purposes of ventilation shall be determined with the LP-gas supply cylinder in place. This shall be accomplished in one of the following manners:

- 1. One side of the enclosure shall be completely open.
- 2. Enclosures that have four sides, complete with a top and bottom:
 - a. At least two ventilation openings at cylinder valve level shall be provided in the sidewall, equally sized, spaced at 180Þ (3.14 rad), and unobstructed. Each opening shall have a total free area of not less than ½" square inch per pound (7.1 cm²/kg) of stored fuel capacity, and not less than a total free area of 10 square inches (64.5 cm²).
 - b. Ventilation opening(s) shall be provided at floor level and shall have a total free area of not less than ½ square inch per pound (7.1 cm²/kg) of stored fuel capacity and not less than a total free area of 10 square inches (64.5cm²). If ventilation openings at floor level are in a sidewall, there shall be at least two openings. The bottom of the openings shall be at floor level and the upper edge no more than 5 inches (127 mm) above the floor. The openings shall be equally sized, spaced at 180Þ (3.14 rad) and unobstructed.

c. Every opening shall have minimum dimensions so as to permit the entrance of a 1/8 inch (3.2 mm)

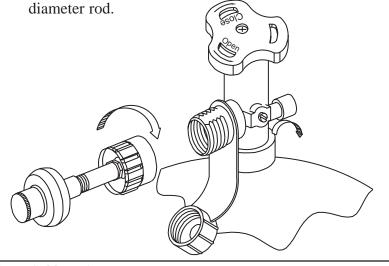

Figure 40. LP Attachment Assembly

Owner's Manual LP Gas Requirements

LP Gas Manifold Pressure

For plumbed-in LP installation, use a convertible regulator and set it for LP gas.

LP Gas Supply Pressure

Maximum line pressure for propane is 11 inches Water Column (2.74 Kpa) but not greater than 5 psi (34.5 Kpa).

LP Gas Pressure Regulator

The unit must be used with the gas pressure regulator and hose assembly supplied with the grill. The regulator will control and maintain a uniform gas pressure in the manifold. The burner orifices have been sized for the gas pressure delivered by the regulator. Replacement regulators and hose assemblies must be replaced with the same ones specified on this manual.

LPG Cylinder Specification

Any LP gas supply cylinder used with this grill must be approximately 12 inches in diameter and 18 inches high. The maximum fuel capacity is 20 lbs. of propane, or 5 gallons. Full cylinder weight should be approximately 38 lbs. (43.7 lbs. nominal water capacity.) Always use the cylinder dust cap on the cylinder valve outlet during transport and when the cylinder is not connected to the grill.

LP gas supply cylinder must be construed and marked in accordance with specifications of the U.S. Department of Transport or the National Standards of Canada, CANICSA-B339, Cylinders, Spheres and Tubes for Transportation Dangerous Goods, and Commision, as applicable;

When purchasing an LP gas cylinder make sure the cylinder has a manual shut off valve. Also ensure that the cylinder has a collar to protect the manual shut off valve.

LP gas cylinder must be provided with a cylinder connection device compatible with the connection for outdoor cooking appliances. LP gas cylinder must be marked "Propane".

When the outdoor grill is not in use, the gas supply must be turned "OFF" at the source. Gas cylinders must be stored out of the reach of children and must not be stored in a building, garage or any other enclosed area.

Storage of an outdoor cooking gas appliance is permissable only if the cylinder is disconnected and removed from the outdoor cooking gas appliance.

Cyclinder supply system must be arranged for vapor withdrawal.

Never store a spare LP gas cylinder under or near this appliance and never fill the cylinder beyond 80 percent full otherwise a fire may cause death or serious injury may occur.

Transporting the LP Gas Supply Cylinder

Only one cylinder should be transported at a time. Transport cylinder in an upright and secure manner with control valve turned off and the dust cap in place.

Page 38 Owner's Manual

NATURAL GAS REQUIREMENTS

Natural Gas Requirements

Always check the rating plate to make sure the gas supply you are hooking up to is the gas type the grill is manufactured for.

IMPORTANT WARNING:

All Cal Flame grills are manufactured with the highest regard to safety. For this reason, Cal Flame grills are either manufactured to operate on Liquid Propane (LP) or Natural Gas (NG) and cannot be converted. To verify the grills operating fuel, remove the bottom drip pan and check serial number label on the left. Either LP or NG will be marked on the operating tab, indicating the proper operating fuel.

Attempting to convert Cal Flame grills from one fuel to another may result in serious injury and void the warranty coverage.

IMPORTANT: Never connect the grill to an unregulated gas supply.

The installation of this appliance must conform with local codes or, in the absence of local codes, to the national fuel gas code, ANSI Z223.1a-1998. Installation in Canada must be in accordance with the standard CAN/CGA-B149.2, Propane Installation Code.

NATURAL Gas Connection: (Must be performed by a licensed contractor or local gas company representative). Ensure that the service supplying the grill is fitted with a shut off valve conveniently positioned to the grill and giving ease of access.

Your Cal Flame Grill for use with Natural Gas comes equipped with its own regulator which MUST NOT be removed. If, this regulator needs to be replaced use only the type specified by Cal Flame for this appliance.

- 1. Remove the rear panel from the BBQ to gain access to the regulator and gas connection point.
- 2. Connect a suitable flex connector to the grill regulator.

Owner's Manual Leak Testing Procedure

LEAK TESTING PROCEDURE

Leak Testing

Perform a leak test at least once each year whether the gas supply cylinder has been disconnected or not. In addition, anytime the gas cylinder is connected to the regulator or any part of the gas system is disconnected or replaced, conduct a leak test.

As a safety precaution, remember to always leak test your grill outdoors in a well-ventilated area. Never smoke or permit sources of ignition in the area while doing a leak test. Do not use a flame, such as a lighted match to test for leaks. Use only a leak testing solution as specified below.

Leak Testing Procedure

- 1. Prepare a leak testing solution of sudsy water by mixing in a spray bottle half-liquid soap and half water.
- 2. Check and make sure all the control knobs are in the OFF position.
- 3. Turn cylinder valve knob counter clockwise one turn to open.
- 4. Apply leak-testing solution by spraying on joints of the gas delivery system.
- 5. Blowing bubbles in the soap solution indicates that a leak is present.
- 6. Stop a leak by tightening the loose joint or by replacing the faulty part with a replacement part recommended by the manufacturer. Do not attempt to repair the cylinder valve if it should become damaged. The cylinder must be replaced.
- 7. If you are unable to stop a leak, shut off the gas supply at the cylinder valve. Remove the cylinder from the grill. Call an authorized gas appliance service technician or LP gas dealer. Do not use the appliance until the leak is corrected.
- 8. Push in and turn any control knob to release pressure in the hose and manifold.
- 9. Turn off the control knob.

Page 40 Owner's Manual

CLEANING AND MAINTENANCE

As with any piece of fine equipment, your new grill must be kept clean and properly maintained to maximize its performance and longevity. Cleaning internal parts of the grill regularly as determined by the amount of use and foods cooked. The entire grill should be cleaned at least once a year. To assure safe and proper maintenance, we recommend you follow these directions carefully.

IMPORTANT: DISCONNECT ELECTRICAL SUPPLY BEFORE CLEANING ANY PART OF THE GRILL.

Cleaning the Grill Racks

The easy way to clean the grill racks is to scrub them immediately after you have finished cooking and turned off the flame. Wear a grill mitt to protect your hand from the heat and steam. Dip a brass bristle barbecue brush in water and scrub the hot grill. Dip the brush frequently to increase the amount of steam. Steam is created as water contacts with the hot grill, assists in the cleaning process by softening food particles. The food particles will fall onto the briquette tray and burn or fall into the drip tray. If the grill is allowed to cool before cleaning, the removal of those residual particles from food will be more difficult.

If desired, when completely cool, remove the grill racks for thorough cleaning. Use soap and water for this cleaning. Specks or grease can either gather on the surface of the stainless steel and bake onto the surface rack and give the appearance of rust. For removal, use an abrasive pad (like Scotch Brite) in conjunction with a stainless steel cleaner. This needs to be done in extreme cases only, or before storing the grill for on extended period

Cleaning the Warming Rack

The warming rack can be cleaned using the same procedure as Cleaning the Grill Racks.

Cleaning the Drip Pan

The full width drip pan will collect grease from the main grill area. The pan should be cleaned after every use to avoid the possibility of a grease fire. Be sure to allow the drip pan to cool prior to cleaning. You may clean the drip pan with a solution of warm soapy water. Make sure to rinse thoroughly to avoid staining.

Care of Stainless Steel Carts & Grills

Stainless steel is a highly preferred material in the residential and commercial industries due to its strength, ability to resist corrosion and its ease of cleaning. Stainless steel is often taken for granted and assumed to be indestructible. However, care must be taken to ensure long life in your Stainless Steel Cal Flame Grills and Carts. To maintain the original appearance of your Cal Flame grill and/or cart, a regular routine must be followed.

DO NOT:

Use wire wool pads, scrappers, harsh abrasive, scoring materials, bleaches, or harsh cleaners on your Cal Flame Stainless Steel cart and/or grill, or allow salt and vinegar mixtures to remain in contact for a long period of time. This will cause scratching, scoring, rusting and pitting of your product.

Your Cal Flame BBQ grill is made of #304 stainless steel. This represents that this component is of non-rusting and non-magnetic stainless steel. There are many types of stainless steel cleaners on the market today. We recommend that you clean the external and internal stainless steel components with a cleaner that is approved for #304 stainless steel and only clean when the grill is cool and in indirect light.

Never use steel wool to clean your grill and never clean the grill when it is hot. Be especially careful when cleaning the Highlighted (shinny) areas or your grill. Only clean these areas when absolutely necessary.

Covering Your Stainless Steel Cart

When not in use and after cooling, cover your Cal Flame Stainless Steel cart with our full length, zippered side canvas cover. The cover will help protect your cart from detrimental effects of weather & environmental pollutants (please see your local Cal Flame dealer for details).

After Use Care

- 1. The easiest way to clean the grill is immediately after cooking is completed and after turning off the flame. Wear a barbecue mitt to protect your hand from the heat and the steam. Dip a brass bristle barbecue brush in hot soapy water and scrub the hot grill rack. The steam from the water coming in contact with the hot rack will assist in the cleaning process by softening any food, dirt or grease stuck to the racks.
- 2. Wipe the grill with a damp soapy cloth and rinse with warm/hot, clean water.
- 3. For more tenacious deposits, including oil, grease and water-borne deposits, use a multipurpose cream cleanser and apply with a soft, damp cloth. Rinsing with warm/hot, fresh, clean water.
- 4. Dry with a soft, dry, clean towel if preferred.

Cleaning the Island Cabinets

Be sure to unplug the electrical supply before cleaning any part of your Cal Flame BBQ. Spray cabinet area with a soap and water solution. Rinse with a gentle stream of fresh water.

Cleaning the Burners

IMPORTANT: All of the gas control knobs must be turned to the off position and the fuel should be off and fuel line disconnected prior to starting this procedure.

To reduce the risk of flashback, this procedure should be followed at least once a month or when your grill has not been used for an extended period of time.

- 1. Remove burners from grill by carefully lifting each burner up and away from the gas valve orifice.
- 2. Wire brush outer surface of burner to remove food residue and dirt. Clean any clogged ports with a stiff wire such as an opened paper clip.
- 3. Inspect the burner for damage (cracks and holes). If any damage is found, replace burner and discontinue grill usage.
- 4. Upon reinstallation, inspect the following: gas valve orifices for cleanliness and condition; the location of the ignitors.

Page 42 Owner's Manual

TROUBLESHOOTING PROCEDURES

If Grill Fails to Operate Properly:

- 1. Turn off gas at source, turn the Control Knobs to the 'OFF' position and wait 5 minutes before trying again.
- 2. Check gas supply at a connections.
- 3. Repeat lighting procedure and if grill still fails to operate properly, turn off gas at source, turn the control knobs to the off position and wait for the grill to cool down and check the following:

Problem: Misalignment of burner tube(s) over orifice(s)

Solution: Reposition the burner tube to properly seat over orifice.

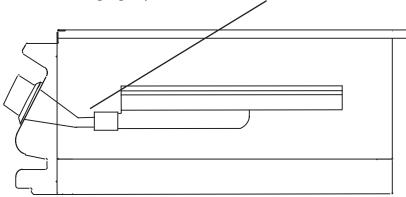

Figure 41. Burner Tube Reposition

Problem: Obstruction In Gas Line

Solution: Remove fuel line from grill. Do not smoke or perform any maintenance in the vicinity of an open

flame. Open gas valve for one second to blow out any debris. Close off gas valve and reconnect

fuel line securely.

Problem: Plugged Orifice

Solution: Remove cooking grills, Flame Tamer and grease tray. Remove burners from bottom of firebox

by pulling cotter pin from beneath burner peg using a standard screwdriver or needle nose pliers. Carefully lift each burner up and away from the gas orifice. Remove the orifice from the control valve. Gently clear any obstruction with a fine wire. Reinstall orifice, reinstall burners over orifices and seat burner peg into position hole at the bottom ledge of the firebox. Replace cotter pins. Replace cooking components and grease collectors. If an obstruction is suspected in

the control valve, please contact your local Cal Flame dealer for assistance.

Problem: Misalignment of Ignitor on Burner

Solution:

Check for proper position of electrode tip. The tip of the electrode should be pointing forward towards the front of the burner and should be free of grease to allow proper sparking. The ignition wire should be connected firmly to the valve ignition device and electrode. Replace the ignition wire if it is frayed or cracked. With gas supply closed and all control knobs set to the off position, check each position ignitor individually for presence of spark at electrode. In turn, push each knob in fully and rotate about 1/4 turn to the left (counter-clockwise) until you hear a loud click. The trigger hitting the strike block should produce a blue spark at the electrode tip. Return control knob to the off position before checking the next ignitor.

While the grill is still hot, you must wait for a minimum of five minutes before commencing re-ignition (this allows accumulated gas fumes to clear). If all checks/ corrections have been made and gas grill fails to operate properly, contact your local Cal Flame dealer.

Problem: Yellow Flame

Solution: Once the entire burner is operating, check the flame color to be sure that flame color is mostly blue. Some yellow at the tips may be present due to impurities in the fuel.

If the flame is golden or yellow in color, the reason could be seasoning salts, oil film, or other foreign matter on the burner.

Problem: Flashback

Solution: When fire occurs in and around the burner tubes, immediately turn off gas at its source and turn

the control knob(s) clockwise to the 'OFF' position. Wait until the grill has cooled off and then

clean the burner tubes and burners as described on page of this manual.

Page 44 Owner's Manual

Owner's Manual Appendix

APPENDIX

The items that will be covered in this section will consist of the following:

Waterfall Operation

Cal Flame Entertainment System

Part Numbers

Lifetime Warranty

Cal Flame Programs

Notes

In order for your retailer to expedite your order, for parts and accessories, it is recommended that you have the information that you attained in the Set-Up and Delivery section. Customer Service will want all this information for warranty purposes.

WATERFALL OPERATION (Optional)

The following models come with the waterfall option: MC-700, G-2000, G-2500, G-2500F and G-3000. To turn the waterfall on, the unit must be plugged in. To turn the waterfall off, the unit must be unplugged.

NOTE: Make sure that there is no debris in the filler pan for the waterfall. The pump will recirculate water up through the fireplace and then filter down the sides and front. It is also important that the owner maintains a consistent water level, as "dry" pumping will burn out the pump motor.

CAL FLAME ENTERTAINMENT SYSTEM

Splash Stereo System

Figure 42. Cal Flame Entertainment System

This system can be used to listen to AM or FM Stereo signals, CD's and also audio from the optional DVD and TV Tuner on our Entertainment Cal Flame unit.

Each Cal Flame unit that is equipped with the Splash Stereo system is delivered with the manufacturers operating instructions. We strongly recommend that you read these instructions prior to operating this unit.

NOTE: Although this unit is marine grade, you will still need to protect it from water and the elements.

- Do not place wet CD's into this unit at any time.
- Always close the CD protection door.

Remember, water damage is not covered by the warranty.

Entertainment Systems

Cal Flame units equipped with the TV / DVD systems use this Splash stereo to broadcast the TV or DVD audio signals.

Set Up:

- 1. Program preset station #1 to 88.7FM to receive the audio signal that the TV and DVD systems are transmitting on.
- 2. Set Base to +3. (As described in the stereos operating manual.)
- 3. Set Treble to +4. (As described in the stereos operating manual.)
- 4. Do Not Use the Z music enhance feature of the Splash Stereo System.
- 5. Set the volume between 15 and 28.

NOTE: If the Cal Flame unit should loose power for any reason, it will be necessary to reset these settings.

Page 46 Owner's Manual

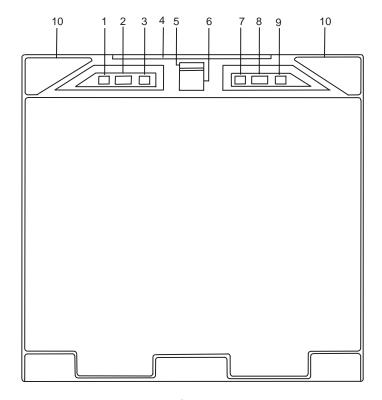

15" TV Monitor Operation: (Optional)

Turning On the TV Monitor:

Once the TV has been opened (either by manual or automatic operation) you will be able to operate the TV with the silver TV remote control.

Front Panel Features (Figure 43)

- 1. Power Button Bright red when system is ON, dim when system is OFF.
- 2. Volume Up/Down Controls volume to external speakers, if connected. Also, used to adjust picture control setting when "contrast", "bright", "sharpness", color" or "tint" is displayed on the screen.
- 3. TV/AV Any video equipment connected to the AUDIO/VIDEO inputs can be used with the TV by pressing this button. Each time the button is pressed the Audio/Video source will change in the following sequence: TV, AV1, AV2, and AUX.
- 4. Sensor Eye Allows the remote control to operate the LCM1502TV's OSD system (On Screen Display), volume Wired Headphone Jacks (and optional external speakers), and for control of Video Media Player connected through a source component harness.
- 5. Three Position Dome Light Switch -
 - Auto Automatically switched on the dome lights in conjunction with the vehicle's interior illumination.
 - Off The dome lights will not turn on in this position.
 - On Turns on the dome lights.
- 6. Screen Release Slides in the direction of the arrow to release the drop down screen.
 - **NOTE**: For safety, hand hold the screen before you slide the screen release to drop down screen.
- 7. Menu Button Gives you access to the OSD Main Menu.
- 8. Channel Up/Down Changes the TV channel.
- 9. ENTER Button Use this button to end the choice on the menu.
- 10. Dome Lights Provides additional information.

- POWER
- 2. VOLUME Up and Down
- 3. TV/AV
- 4. SENSOR EYE
- 5. THREE POSITION DOME LIGHT SWITCH
- 6. SCREEN RELEASE
- 7. MENU
- 8. CHANNEL Up and Down
- 9. DOME LIGHT

Figure 43. Television Layout

Remote Control Operation (Figure 44)

1. TV Controls:

a. TV Power

Press this button to turn on the set.

Press the button again to turn the set off.

2. Direct Access (0-9, 1--) Number Buttons

Use these buttons to select a channel. The channel number chosen will be displayed on the screen for about four seconds. To select channels 0-99, press two numbers. For example, to select channel 8, press 0,8. To select above 100, press the 1-button, then the number buttons for the last two digits of the channel. For example, to select channel 115, press 1--, 1,5.

3. CHANNEL Up and Down

Use these buttons to select pre-programmed channels of two select channels up or down.

4. VOLUME Up and Down

Use these buttons to raise or lower the volume level of the Wired Headphones or External Speakers if installed. They are also used to make adjustments in the picture mode.

NOTE: These buttons will not affect the volume of wireless headphones or a wired RF modulator. When using these devices, the volume must be adjusted with the headphone volume control or with your radios volume control.

5. MENU Button

Press the MENU button. The MENU display appears. Use the Channel Up and Down buttons to select the desired function, then press ENTER button to end the choice.

6. TV/VIDEO Button

Press this button to access the AUDIO/VIDEO input jacks, on the front and rear of the TV. As the button is pressed, the on-screen display will cycle as follows:

$$\longrightarrow$$
 TV \longrightarrow AV1 \longrightarrow AV2 \longrightarrow AUX \neg

7. MUTE Button

Press this button to turn the TV sound off. Press again to restore sound to the previously set level. MUTE may also be released by pressing the VOLUME +/-.

8 When tuned to a channel press this button to store or erase the channel from memory. The stored channel numbers are displayed in GREEN on the screen and the no stored channel numbers are in RED.

9. AUTO PROGRAM Button

Select the regular channel broadcast TV or CABLE TV for AUTO PROGRAM. All the channel numbers for TV or CABLE TV will be scanned. The broadcasting signals will be detected and automatically stored.

10. ENTER Button

Use this button to end the choice on the menu.

11. PICTURE SELECT Button

Each time this button is pressed the on-screen picture adjustment display cycles through "adjustment screens" as follows:

→ BRIGHTNESS → CONTRAST → COLOR → SHARPNESS → TINT ¬

Page 48 Owner's Manual

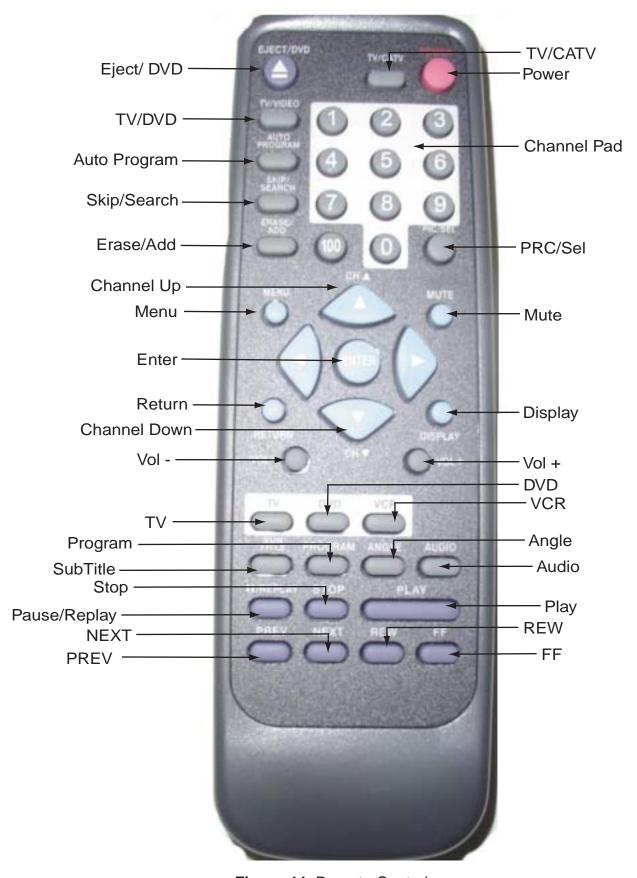

Figure 44. Remote Control

VCR Controls

12. VCR POWER Button

This button is used to turn the unit on and off.

13. "REW" REWIND Button

If this button is pushed while the tape is stopped, the tape will rewind. If this button is pushed while the tape is playing, the VCR will go into rewind search mode. For more information on search feature of the VCR, consult VCR Owner's Manual.

14. PLAY Button

Press this button to activate play mode while a tape is loaded into the VCR. This button may also be used to disengage search and pause modes. For more information, consult the VCR Owner's Manual.

15. "F.FWD" FAST FORWARD Button

If this button is pushed while the tape is stopped, tape will fast forward. If this button is pushed while the tape is playing, the VCR will go into fast forward search mode. For more information on search feature of the VCR, consult the VCR Owner's Manual.

16. STOP Button

Press this button to stop the video tape.

17. REPLAY Button

Press this button will rewind the video tape and immediately begin playback when the video tape is fully rewound.

Operation

- 1. Point the remote control directly at the TV Monitor.
- 2. Press the **Red Power Button** located at the top left side of the remote control.
- 3. Allow a few seconds for the TV monitor to warm up before pressing any other buttons.
- 4. Once on, the TV monitor will display a small icon at the lower left side signifying which mode the TV is currently in.
- 5. Press the "SELECT" button located at the top right side of the TV remote control until the icon "COMPOSITE VIDEO" is displayed on the screen of the TV monitor. This will allow the TV Monitor to accept the signal from the DVD player.
- 6. When an antenna, cable or satellite system is connected to the coaxial cable on the right front side of the spa, you will be able to receive live TV signals by pressing the "SELECT" button until the "COMPOSITE TV" icon appears on the TV monitor. Allow a few second for the TV tuner to acquire the new signal prior to switching channels.
- 7. Press the right "VOL" button to adjust the volume up to "80" as displayed on the screen. This will allow the Stereo system to receive enough volume to reproduce the audio signal without distortion.

NOTE: You will not be able to hear audio form the TV Monitor itself. All audio signals for the TV or DVD are only acquired through the stereo when programmed to 88.7FM.

Adjusting the Picture

When watching the TV programs, the quality of the picture can be adjusted to suit your taste.

- 1. Press MENU. The main menu appears.
- 2. Press SELECT VIDEO. The video source appears. Press this button to access the AUDIO/VIDEO input jacks.
- 3. Select CLOSED CAPTION and then press ENTER.

Closed captioning lets you display the audio portion of a program as text on the TV screen. This is useful to the hearing impaired or anyone who wants to watch a program without a sound.

Page 50 Owner's Manual

There are two types of closed captioning available: C1 (Caption 1) and C2 (Caption 2). C1 displays the full translation of the primary language in your area. C2 may be used as a source for secondary languages, simplified English, or other translations transmitted in your area.

Closed captioning is not available on all channels or at all times. Only specific programs are encoded with closed captioning information.

- 4. Press either CHANNEL up or down to select the function. Make sure the highlight bar is SET PICTURE and then press ENTER.
- 5. Select the item to adjust. For example:
 To adjust brightness, press CHANNEL up or down buttons to select BRIGHTNESS and press ENTER.
- 6. Adjust the level by pressing VOLUME.
- 7. To adjust other items, repeat all of the above.

NOTE: The menu or display disappears from the screen if you do not press + or - within a few seconds. Whenever a menu or display disappears from the screen, and + or - buttons on the front of the TV become the volume adjustment buttons. If you want to adjust the picture only, you can use the remote control by simply pressing the PICTURE SELECT.

Description of Adjustment Items

CONTRAST

BRIGHTNESS

· · · · · · · · · · · · · · · · · · ·	
Press VOLUME Down	Press VOLUME Up
Decrease picture contrast for soft color	Increase picture contrast for vivid color
Darken the picture	Brighten the picture

SHARPNESS Decrease picture sharpness Increase picture sharpness

TINT Decrease Tint Increase Tint

COLOR Decrease color intensity Increase color intensity

To restore the factory settings

Select the item of picture while the main menu is displayed. Then select the item of RESET. All the picture functions (CONTRAST, BRIGHTNESS, SHARPNESS, TINT, COLOR) will go back to the factory settings.

- 8. Press either CHANNEL up or down to select the function. Make sure the highlight bar is AUTO PROGRAM and then press ENTER.
- 9. Press CHANNEL either up or down to select the function. Make sure the highlight bar is ANTENNA INPUT and then press ENTER.

Remote Infrared Sensor/Repeater

The LCM1502TV incorporates a Infrared Sensor which relays the signals from the remote control to allow the LCM1502TV to be controlled simply by pointing it's remote control at the remote sensor. This provides control of the auxiliary equipment such as a Flex vision VCR or DVD Player. The Remote Infrared Sensor can relay signals from most manufacturers Remote Control to its respective component connected to the Video 1 and 2 inputs. In this case you must use the Remote Control supplied with the other manufacturers component.

Cal Flame Entertainment System Operation

DVD Player and Surround Sound Processor (Optional)

This system contains the DVD player and DVD remote controller.

NOTE: Although encased in a plastic housing with weather seals, this system and remote control are not waterproof. You must be take every step necessary to keep this system dry. Water damage is not covered by the manufacturers warranty.

These instructions are to describe basic functions. Please see the DVD manufacturers operating instructions for other features and functions. These instructions are delivered with the Cal Flame owners manual in a clear plastic bag inside the stainless steel cabinet

Operation

- 1. Press the **POWER** button on the DVD unit or remote control to turn the system on. A "Welcome DVD Video" banner will be displayed across the screen.
- 2. Press **POWER** on the Stereo / Cd player
- 3. Move the DVD selector switch (Located next to the DVD player) to the **ON** position. This will allow the Audio signal to be received by the Stereo / CD player

NOTE: When not using the DVD player the Audio selector switch must be in the of position to receive regular AM an FM broadcasts.

- 4. Tune the Stereo / Cd player to 88.7 FM to receive the audio signal.
- 5. Press the OPEN button on the DVD player and insert a DVD.

CAUTION: DO NOT INSERT WET DVD'S.

6. Press either the ENTER button on the DVD player or the Play button on the remote control to start the DVD

IMPORTANT:

Recommended stereo settings are BASS +3, TREBLE +4 and stereo volume not to exceed 28. Exceeding these setting or using the Z -enhanced feature on the stereo will cause the system to distort and damage speakers.

Figure 45. Cal Flame Entertainment DVD Player.

WARNING:

DVD System and remote control are NOT waterproof or water-resistant. Water damage is not covered by the manufacturers warranty. Please make sure that hands and DVD's are dry before coming in contact with this or any electronic option.

Page 52 Owner's Manual

Owner's Manual Accessories

Operating the DVD System In TV Mode:

Figure 46. DVD Player

The DVD system is used to feed the audio signal from the TV Tuner to the stereo. You will need to switch the audio and Video modes with DVD remote to properly receive picture and sound.

NOTE: The Stereo must be tuned to 88.7FM to receive audio signals from either the DVD or TV Tuner.

Instructions:

- 1. Turn on DVD system as mentioned on the previous pages.
- 2. Press the **SELECT** button on the TV Remote Control to switch Video to **COMPOSITE TV.**
- 3. Press the A/V button on the DVD Remote Control to switch the Video from OUT to IN.
- 4. Press the Channel Up or Down buttons on the TV remote control to select TV Channel.

Switching Back to DVD Operation:

- 1. Press the **SELECT** button on the TV Remote Control to switch Video to **COMPOSITE VIDEO**.
- 2. Press the A/V button on the DVD Remote Control to switch the Video from IN to OUT.
- 3. Press the **PLAY** on the DVD remote Control.

WARNING: DVD System, Tuner System and their remote control's are NOT waterproof or water-resistant. Water damage is not covered by the manufacturers warranty. Please make sure that hands and DVD's are dry before coming in contact with this or any electronic option.

L Ι M Т Ε D

C.A.I. offers a lifetime warranty due to defects in material and workmanship at time of delivery and/or specified time frame on:

Equipment Warranty

Against deterioration and corrosion

- Flame Tamers Stainless Steel
- Burners Brass
- Grills Stainless Steel

Component warranty

Against deterioration and corrosion

- Rotisserie HD Stainless steel
- Mountings Stainless Steel
- Grill Lid and Body Stainless Steel

Structural Warranty

CA.I. warranties the structural frame to maintain its integrity.

• Frame - Lightweight, Durable Galvanized Steel

Finish Guarantee

C.A.I. guarantees the decorative finishes at time of delivery, such as:

- Stucco
 - Grout
- Brick
- Rock • Tile
- Waterfall

C.A.I. warrants the carts structural frame, all non-stainless steel fasteners, rotisserie motor, temperature gauge, plastic items, stainless steel drawers, doors, sinks, warming racks, ignitors, stainless steel buners and gas valves for a period of 1 year.

Extent of Warranty This 2004 Cal Flame Warranty is only valid on Chef, Master Chef and Gourmet Series models delivered in the continental United States and Canada, and extends through the selling dealer to the original purchaser at the original site of installation. This warranty becomes valid at time of purchase and ends either by specified time-frame listed above, owner transfer, or relocation.

All barbecue units/carts are manufactured with the highest quality appliances and are quaranteed to be free from defect of material and workmanship at time of delivery. The appliance warranty is extended through the manufacturer of the product. These items include but are not limited to the following: Stereos, speakers, refrigerators, keg refrigerator, accessories, televisions and awnings.

Warranty Performance In the event of a malfunction or defect covered under the terms of this warranty, the factory authorized selling dealer is responsible for performing all necessary repairs. To obtain service, contact the authorized selling dealer. In the event the consumer is unable to obtain satisfactory customer service from the authorized selling dealer, written notification must be given to the C.A.I. Customer Relations Department within (10) ten days of the reported failure. There will be no charge for parts on a covered item. However, the authorized service agent may assess labor, freight and a reasonable travel or mileage charge per service call. If C.A.I. determines that repair of a covered item is not feasible, C.A.I. reserves the right to replace the defective merchandise with merchandise equal in value to the original purchase price. Warranty repair and/or replacement is the sole discretion of C.A.I. and this warranty does not cover costs therein, including but not limited to: freight, removal. re-installation,etc. This warranty is non-transferable and may not be extended beyond the above mentioned time frames what-so-ever by any of C.A.I.'s representatives.

W arranty Limit ations and Exclusions This warranty is void if the barbecue unit/cart has been subject to negligence, alteration, misuse, abuse, repairs, dings, dents, scratches incorrect and/or prohibited applications, as specified in the Owner's Manual. Gas lines must be installed by a licensed plumber only or local gas co.), incorrect electrical installation (licensed electrician only is acceptable). Serviced by non- C.A.I. authorized representatives, acts of God and any other cases beyond the control of C.A.I. Please refer to the owner's manuals for examples of exclusions and of common acts invalidating this guarantee This limited warranty applies only to barbecue units used for personal, family, and outdoor household purposes.

Disclaimers C.A.I. shall not be liable, under any circumstances, for loss of use of the barbecue unit or other incidental or consequential costs, expense or damages to persons or property, which may include but are not limited to removal of permanent deck or other custom fixtures or the necessity for crane removal. Any implied warranty shall have duration equal to the duration of the applicable warranty stated above.

Legal Remedies This Limited Warranty gives you specific legal rights and you may have other rights, which may vary from state to state.

Customer Service For customer service, contact the authorized selling dealer immediately. If you need additional information or assistance, please contact the C.A.I Customer Relations Department at 1462 East Ninth Street, Pomona, CA 91766, or call 909-623-8781

www.calspas.com

1462 East Ninth Street Pomona CA, 91766 1 (800) CAL-SPAS

This Limited Warranty is effective for BBQ's manufactured after July 1, 2004
